- The sensor housing can be cleaned using a damp cloth. Do NOT immerse the sensor in any cleaning media.
- At ambient conditions. All performance measurements are at STP unless otherwise stated. Following extreme temperature fluctuations, re-calibration may be required.

#### ELECTRICAL INTERFACE

Pin	Designation
1	Vs (+5V)
2	GND (0V)
3	3.3V USART Sensor Transmit
4	3.3V USART Sensor Receive

CONNECTION: Four gold-plated pins (0.64mm<sup>2</sup>) on a 2.54mm grid for PCB mounting via sockets or hand soldering using no-clean flux.

NOTE: Do NOT put the sensor through a PCB washing process.

NOTE: Always apply power to sensor pins 1 and 2 before attempting to communicate on pins 3 and 4.

The sensor should be treated as an electronic component and handled using the correct ESD handling precautions.

### **ORDER INFORMATION**

Specify the part number below when ordering:

L O X - 0 2 - S

Do not exceed maximum ratings and ensure sensor(s) are operated in accordance with their requirements.

Carefully follow all wiring instructions. Incorrect wiring can cause permanent damage to the device.

Do NOT use chemical cleaning agents.

Failure to comply with these instructions may result in product damage.

These products must not be used in safety applications where product failure could cause injury or risk to life
